

## Loom Tube

Loom Tube is used to create looms from loose wires and is a simple way to create a harness. The corrugated tubing has a cut along the length into which the wires are slipped, and can break out at any point. The tubing is:

- Crush proof
- Flame retardant
- UV stabilised
- Resistant to chemicals
- Has a quick installation time

Simply slip the wires into the split tube and anchor the harness with ties if necessary. Supplied in 25m reels.

- Material: Flame retardant polypropylene
- Maximum operating temperature: 135 C
