

## STAINLESS STEEL CABLE TIES

### Stainless Steel Cable Ties

Stainless steel cable ties are a quick, effective way of securing cables that are in a hostile environment. They have a unique ball bearing locking mechanism that allows the tie to be quickly and easily installed, but not undone. They install much quicker than traditional strapping systems. The heavy duty ties have an off-set tip to speed insertion of the tie. The ties are made from 316 non magnetic stainless steel. Ties are packed in sturdy cardboard boxes. Typical uses are flame-proof installations, the chemical industry and long-term external exposure.
