

**VGACAT5EA**  
**VGA & Audio Long Range CAT5 Ext Kit**

Transmitter Front View

Receiver Front View

The Active Long Range Kit allows VGA video signals to be transmitted up to 300 meters via 4-pairs CAT5 unshielded twisted cable. Used in pairs, the VGA extender is used in home or commercial applications as a smart, fast and cost-effective solution against the use of costly and bulky VGA cables.

Allows VGA monitors to connect extended distances from the PC via standard twisted pair cable.

Ideal for classrooms video distribution, lecture halls, retail kiosks, video information displays, overhead projector systems, PC-training systems and tradeshow PC demo systems.

**Features**

- Active type, including transmitter and receiver.
- Built in contrast, brightness adjustment at Receiver.
- Supports up to 1600x1200 @ 85Hz.
- Uses 4 pairs UTP CAT5 cable instead of VGA cable for long range transmission.
- Long range transmission up to 300 meters (Max.)
