

802.11b / 802.11g Indoor 6dBi Directional Antenna

D-Link, an industry leader in networking, introduces the ANT24-0600 Directional Indoor Antenna. The ANT24-0600 is a range extender antenna which provides an extended range for your wireless network. Providing 2 to 2.5 times the output over bundled dipole antennas (2dBi), this 6dBi directional antenna will significantly extend your wireless network coverage area. With support for all 2.4GHz standards, including IEEE 802.11b and the new high speed 802.11g standard, ANT-24-0600 will work on any wireless device with a RP SMA Connector.

The 2.4GHz ANT-24-0600 Directional Antenna works with all AP/Routers to boost high-speed wireless signal in a specific direction. Supporting a plug-and-play installation, ANT-24-0600 can be installed in 2 simple and easy steps. Simply remove one of default antennas from AP/ Router and connect the new ANT-24-0600. This antenna can be mounted for better performance and maximized signal boost. There are 3 mounting methods of choice!

Features

- Extend the Range of Your Wireless Device
- Improves Directional Coverage
- Includes Wall Mounting Kit
- Works with 802.11b & 802.11g Networking Devices
- No Software Needed

802.11b / 802.11g Indoor 6 dBi Directional Antenna

Specifications

Standard

IEEE 802.11b Wireless LAN

Operating Frequency Range

2.4GHz - 2.5 GHz

Antenna Type

Panel directional

VSWR

• 1.5 : 1 max.

Antenna Gain

• 6.0dBi Typical

Polarization Type

• Linear
• Vertical

HPBW / Horizontal

• 80 degrees

HPBW / Vertical

• 80 degrees

Power Handling

• 20 watts (cw)

Impedance

• 50 Ohms

Connector

• SMA
• Reverse SMA to TNC

Cable

• 1.5m ULA-316 Fixed Cable

Operating Temperature

• 10°C to 55° C

Humidity

• 95% @ 25° C

Weight

• 110 grams

Warranty

• 1 Year

Add the ANT24-0600 to your 802.11b/g wireless PCI Adapter, Router or Access Point for additional wireless signal range.
